

Matthew Linder

Autonomous Solutions Researcher at Vision Systems Intelligence- VSI

matthew@vsi-labs.com 651-323-7229

University of Minnesota-Morris (BS in Computer Science 2016)

I am an autonomous vehicle software developer and analyst with a focus on artificial intelligence for VSI Labs. I track and research the various development and deployment activities of automakers and tech companies with respect to autonomous vehicles or self-driving cars. I also lead a small software development team that works on research projects that examine to products, services, and techniques used in autonomous driving. I research components of Autonomous Vehicle systems including sensors, processors, software, development tools, deep learning tools, and deep learning architectures.

VSI is considered one of the industry's top advisors by supporting R&D & planning departments within major automotive and suppliers worldwide.
