

Amy Sissala graduated from Illinois Institute of Technology in 2008 with a bachelor's degree in Architectural Engineering. After graduation she moved to Connecticut to perform computer analyses on US Navy submarines at General Dynamics Electric Boat.

After completing her master's degree in Mechanical Engineering from Rensselaer Polytechnic Institute in 2011 she started hearing about the next big thing, 3D printing. Starting off with maker systems and eventually moving up to the industrial machines, Amy learned everything she could about this new field.

In 2014, she moved to Minnesota and is now a Senior Print Quality Engineer at Stratasys. Her responsibilities include tuning new systems and new materials to satisfy project needs and customer demands. She is driven to constantly be learning new things.
